

THE
PHILOSOPHICAL MAGAZINE

EDITOR

PROFESSOR N. F. MOTT, M.A., D.Sc., F.R.S.

EDITORIAL BOARD

SIR LAWRENCE BRAGG, O.B.E., M.C., M.A., D.Sc., F.R.S.

SIR GEORGE THOMSON, M.A., D.Sc., F.R.S.

W. H. TAYLOR, M.A., D.Sc.

VOL. VI.—EIGHTH SERIES

JANUARY—DECEMBER 1961

LONDON:

TAYLOR & FRANCIS LTD, RED LION COURT, FLEET STREET, E.C.4.

“Meditationis est perscrutari occulta; contemplationis est admirari perspicua.... Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem.”—*Hugo de S. Victore.*

——“Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus furrugine condât,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu.”

J. B. Pinelli ad Mazonium.

8th ser.
v.6
pt.1

CONTENTS OF VOL. VI. Nos. (61-72) (EIGHTH SERIES)

NUMBER 61—JANUARY

	PAGE
Observations on an Electrical Effect obtained during Deformation of Sodium Chloride Crystals. By G. REMAUT and J. VENNIK, Laboratorium voor Kristallografie en Studie van Vaste Stoffen Rozier, 6, Gent, Belgium	1
Effect of Slip Distribution on the Fracture Behaviour of Magnesium Oxide Single Crystals. By R. J. STOKES, T. L. JOHNSTON and C. H. LI, Honeywell Research Center, Hopkins, Minnesota, U.S.A.	9
Grain Boundary Luminescence in an Alkali Halide Phosphor. By R. ILLINGWORTH, Department of Electron Physics, The University of Birmingham, Edgbaston, Birmingham	25
Effective Ionic Charge in Relation to Lattice Vibrations. By J. R. HARDY, J. J. Thomson Physical Laboratory, Whiteknights Park, University of Reading	27
The Relation Between the Plastic Deformation of Aluminium Single Crystals and Polycrystals. By S. HOWE and C. ELBAUM, Physics Department, Metals Research Laboratory, Brown University, Providence, Rhode Island	37
Possible Dislocation Gating Mechanisms for Fatigue Extrusion. By A. J. KENNEDY, The College of Aeronautics, Cranfield	49
On the Theory of Solid Solutions in Copper, Silver and Gold. By W. HUME-ROTHERY, Department of Metallurgy, Oxford and D. J. ROAF, Cavendish Laboratory, Cambridge	55
The Charge Correlation Function of a Plasma in a Magnetic Field. By S. F. EDWARDS, Theoretical Physics Division, University of Manchester and Theoretical Physics Division, A.E.R.E., Harwell	61
A New Approach to Transport Problems in Fully Ionized Plasmas. By S. F. EDWARDS and J. J. SANDERSON, Theoretical Physics Department, University of Manchester, and Theoretical Physics Division, A.E.R.E., Harwell	71
The Study of High-energy γ -rays Produced by Cosmic Radiation at 40000 feet. Part I. Experimental Disposition, and Determination of Energy and Nature of Electromagnetic Cascades. By J. G. DUTHIE, C. M. FISHER, P. H. FOWLER, A. KADDOURA, D. H. PERKINS and K. PINKAU, H. H. Wills Physical Laboratory, University of Bristol	89
The Study of High-energy γ -rays Produced by Cosmic Radiation at 40000 feet. Part II. The Energy Spectrum of Cascades and its Interpretation. By J. G. DUTHIE, C. M. FISHER, P. H. FOWLER, A. KADDOURA, D. H. PERKINS, K. PINKAU and W. WOLTER, H. H. Wills Physical Laboratory, University of Bristol	113
The Interface between a Metal and an Electrolytic Solution. By R. J. WATTS-TOBIN, Cavendish Laboratory, Cambridge	133
Correspondence :	
Magnetic Properties of Chromium between 0° and 350°C. By E. W. COLLINGS, F. T. HEDGCOCK and A. SIDDIQI, Department of Physics, University of Ottawa, Ottawa, Canada	155

	PAGE
The Mechanism of Surface Effects in Crystal Plasticity. By J. J. GILMAN, General Electric Research Laboratory, Schenectady, N.Y.	159
Delayed Alpha Particles from ^{16}N . By R. E. SEGEL, J. W. OLNES and E. L. SPRENKEL, Aeronautical Research Laboratory, Dayton, Ohio, U.S.A.	163
Remark on the Seebeck Coefficient of Polar Semiconductors. By J. APPEL, John Jay Hopkins Laboratory for Pure and Applied Science, General Atomic Division of General Dynamics Corporation, San Diego, California	167
Beta-decay of ^{16}N : Conservation of Spin and Parity in ^{16}O . By D. E. ALBURGER, R. E. PIXLEY and D. H. WILKINSON, Brookhaven National Laboratory, Upton, New York, U.S.A. and P. DONOVAN, Brookhaven National Laboratory and Bell Telephone Laboratories, Murray Hill, New Jersey, U.S.A.	171
Reviews of Books	175

NUMBER 62—FEBRUARY

Thermally-activated Glide in Magnesium Crystals from 4.2° to 420°K . By H. CONRAD, R. ARMSTRONG, H. WIEDERSICH and G. SCHOECK, Westinghouse Research Laboratories, Pittsburgh 35, Pennsylvania.	177
Radiation-enhanced Helium Precipitation in Copper. By A. N. GOLAND, Brookhaven National Laboratory, Upton, New York.	189
On the Fracture Behaviour of Magnesium Oxide Bi-crystals. By A. R. C. WESTWOOD, Research Institute for Advanced Studies, Baltimore 12, Maryland, U.S.A.	195
On the Edwards-Matthews Approach to π -N Scattering. By CHAN HONG-MO, Department of Mathematical Physics, University of Birmingham.	201
The Flow Stress of Metals at Low Temperatures. By P. FELTHAM, Department of Metallurgy, The University, Leeds.	209
Evidence for the Production of Debris by Moving Dislocations in Sodium Chloride. By R. W. DAVIDGE and R. W. WHITWORTH, Department of Metallurgy, Imperial College, London, S.W.7.	217
Demagnetization of Igneous Rocks by Alternating Magnetic Fields. By E. IRVING, P. M. STOTT and M. A. WARD, Department of Geophysics, Australian National University, Canberra, A.C.T.	225
'Conservative Climb' of a Dislocation Loop due to its Interaction with an Edge Dislocation. By F. KROUPA and P. B. PRICE, Cavendish Laboratory, Cambridge, England.	243
The Stability of a Wavefunction under a Perturbation. By G. G. HALL, Department of Mathematics, Imperial College, London, S.W.7.	249
Creep and Stress Relaxation in Alpha-brass at Low Temperatures. By P. FELTHAM, Department of Metallurgy, The University, Leeds.	259
Interactions between Dislocations with Burgers Vectors at 120° in Crystals of Silver Bromide. By J. T. BARTLETT and J. W. MITCHELL, H. H. Wills Physics Laboratory, University of Bristol.	271
Thermal Expansion of Aluminium at Low Temperatures. By EVA HUZAN, C. P. ABBISS and G. O. JONES, Department of Physics, Queen Mary College (University of London), London, E.1.	277
The Transition to the Metallic State. By N. F. MOTT, Cavendish Laboratory, Cambridge.	287

Correspondence:

PAGE.

Hammer Tracks from the Photodisintegration of Light Emulsion Nuclei. By W. T. MORTON and T. G. WALKER, Department of Natural Philosophy, University of Glasgow.....	311
A Comparison of Vacancy and Interstitial Loops in Graphite. By G. K. WILLIAMSON, Berkeley Nuclear Research Laboratories, Gloucestershire and C. BAKER, Department of Metallurgy, Cambridge University.....	313
Evidence of Sub-surface Cross-slip in Fatigued Copper. By A. H. MELEKA, W. BARR and A. A. BAKER, Metal Physics Section, British Iron and Steel Research Association, London.....	315
Reviews of Books.....	317

NUMBER 63—MARCH

The Distribution of Deformation in Lead Fatigued <i>in vacuo</i> . By K. U. SNOWDEN, The Baillieu Laboratory, University of Melbourne, Victoria, Australia.....	321
Some New Habit Features in Crystals of Long Chain Compounds. Part I. Paraffins. By A. KELLER, H. H. Wills Physics Laboratory, University of Bristol 8.....	329
Some New Habit Features in Crystals of Long Chain Compounds. Part II. Polymers. By D. C. BASSETT and A. KELLER, H. H. Wills Physics Laboratory, University of Bristol, Bristol 8.....	345
Charge Effects during Inhomogeneous Deformation of Rocksalt. By F. RUEDA and W. DEKEYSER, Laboratorium voor Kristallografie, Rozier 6, Ghent, Belgium.....	359
The Soft X-Ray Emission Spectra of Sodium, Beryllium, Boron, Silicon and Lithium. By R. S. CRISP and S. E. WILLIAMS, Department of Physics, University of Western Australia, Nedlands, W.A.....	365
A Variational Approach to Correlation in an Electron Gas. By W. H. YOUNG, Department of Physics, The University, Sheffield.....	371
Deformation Twinning in Face-Centred Cubic Metals. By J. A. VENABLES, Cavendish Laboratory, University of Cambridge.....	379
The Influence of Atmospheric Corrosion on the Fatigue Limit of Iron-0.5% Carbon. By N. J. WADSWORTH, Metallurgy and Physics Department, Royal Aircraft Establishment, Farnborough, Hants.....	397
The Kinetics of Impurity Precipitation on Dislocations. Small Drift Theory. By R. BULLOUGH and R. C. NEWMAN, Research Laboratory, Associated Electrical Industries, Aldermaston Court, Aldermaston, Berkshire.....	403
The Hall Coefficient of Liquid Mercury. By N. CUSACK and P. KENDALL, Department of Physics, Birkbeck College, London.....	419
Etching of Diamond Surfaces with Gases. By T. EVANS and D. H. SAUTER, J. J. Thomson Physical Laboratory, University of Reading.....	429
Etch Pits and Dehydration Nuclei on Crystals of Gypsum. By J. E. BRIGHT and M. J. RIDGE, Division of Building Research, Commonwealth Scientific and Industrial Research Organization, Melbourne, Australia....	441
Observation of de Haas-van Alphen Type Oscillation in the Acousto-magnetic Attenuation of Zinc. By D. F. GIBBONS, Bell Telephone Laboratories, Incorporated, Murray Hill, New Jersey.....	445

	PAGE
On Dislocation Loops Formed in Zinc Crystals during Low Temperature Pyramidal Glide. By P. B. PRICE, Physics and Chemistry of Solids, Cavendish Laboratory, Cambridge.....	449
Correspondence:	
The Cooperative Movement of Dislocations in Very Pure Aluminium Foil. By R. N. WILSON and P. J. E. FORSYTH, Metallurgy and Physics Department, Royal Aircraft Establishment, Farnborough, Hants.....	453
Correlation between Magnetic Susceptibility and Hydrogen Solubility in Alloys of Early Transition Elements. By D. W. JONES, N. PESSALL and A. D. McQUILLAN, Department of Physical Metallurgy, University of Birmingham.....	455
Density and Expansivity of Solid Xenon. By A. J. EATWELL and B. L. SMITH, Department of Physics, Queen Mary College, University of London, E.1.....	461
Dislocation Loops and Hardening in Neutron Irradiated Copper. By M. J. MAKIN, A. D. WHAPHAM and F. J. MINTER, Metallurgy Division, A.E.R.E., Harwell.....	465
Reviews of Books.....	469

NUMBER 64—APRIL

Theory of the Self-diffusion Coefficient in Cubic Metals. By G. M. POUND, Metallurgy Department, The University of Sheffield and W. R. BITLER and H. W. PAXTON, Metals Research Laboratory, Carnegie Institute of Technology, Pittsburgh 13, Pennsylvania.....	473
Total Cross Section of Lead for Slow Neutrons. By M. F. COLLINS and G. DOLLING, Cavendish Laboratory, Cambridge.....	485
An X-ray Study of Deformation Stacking Faults at Low Temperatures in Lead, some Lead Alloys, and Aluminium. By G. F. BOLLING, Westinghouse Research Laboratories, Pittsburgh 35, Pa., T. B. MASSALSKI, Mellon Institute, Pittsburgh 13, Pa. and C. J. McHARGUE, Oak Ridge National Laboratory, Oak Ridge, Tennessee.....	491
Effect of Irradiation Growth on the Creep of Uranium Under a Uniaxial Load. By W. S. BLACKBURN, Nuclear Research Centre of C. A. Parsons Ltd., Fossway, Newcastle upon Tyne, 6.....	503
The Optical Properties of Liquid Germanium, Tin and Lead. By J. N. HODGSON, University College, Keele, Staffs.....	509
The Alpha-particle Component of the Primary Cosmic Radiation over Northern England. By G. R. STEVENSON and C. J. WADDINGTON, H. H. Wills Physical Laboratory, University of Bristol.....	517
Dislocation Decoration by Precipitation in Gold-Cobalt Alloys. By R. B. CAMPBELL, Franklin Institute Laboratories, Philadelphia, Penn- sylvania and L. MULDAWER, Institut Fourier, University of Grenoble....	531
Precipitation and Irradiation Hardening in Iron. By D. HULL and I. L. MOGFORD, Atomic Energy Research Establishment, Harwell, Berks	535
The Formation of Sub-grain Structure by Alternating Plastic Strain. By J. HOLDEN, National Engineering Laboratory, East Kilbride, Glasgow	547
The Half-life of Vanadium-50. By A. McNAIR, Atomic Weapons Research Establishment, Aldermaston, Berkshire.....	559
The Half-life of Rubidium-87. By A. McNAIR and H. W. WILSON, Atomic Weapons Research Establishment, Aldermaston, Berkshire.....	563

	PAGE
The Solar Diurnal Variation of Cosmic Rays during 1958 and 1959, at Makerere, Hermanus and Herstmonceux. By D. M. THOMSON, Physics Department, Makerere College, Kampala, Uganda.....	573
Helical Dislocations in Crystals of Lead Iodide. By A. J. FORTY, H. H. Wills Physics Laboratory, University of Bristol.....	587
Notice	598
Reviews of Books.....	599

NUMBER 65—MAY

Large Dislocation Loops in Antimony Telluride. By P. DELAVIGNETTE and S. AMELINCKX, Centre d'Etude de l'Energie Nucleaire, MOL, Belgium	601
The Scattering of Phonons by Bound Electrons in a Semiconductor. By I. C. PYLE, Cavendish Laboratory, University of Cambridge.....	609
The Electronic Structure of Disordered Systems. By S. F. EDWARDS, Theoretical Physics Department, The University, Manchester.....	617
Work-hardening of Hexagonal Close-packed Crystals and in the Easy Glide Region of Face-centred Cubic Crystals. By A. SEEGER, H. KRONMÜLLER, S. MADER and H. TRÄUBLE, Max-Planck-Institut für Metallforschung, Stuttgart, and Institut für theoretische und angewandte Physik der Technischen Hochschule Stuttgart, Germany.....	639
The Development of Cascades Initiated by Nuclear Interaction. By K. PINKAU, H. H. Wills Physics Laboratory, University of Bristol.....	657
Lattice Spacing Relationships and the Electronic Structure of H.C.P. ζ Phases Based on Silver. By H. W. KING and T. B. MASSALSKI, Mellon Institute, Pittsburgh 13, Pa., U.S.A.	669
A Search for Anisotropy of Inertial Mass using a Free Precession Technique. By R. W. P. DREYER, Department of Natural Philosophy, University of Glasgow.....	683
The Magnetic Properties of Three Carboniferous Sills. By C. W. F. EVERITT, Physics Department, Imperial College, London.....	689
The Relative Hardness of the Hard Directions in Diamond. By EILEEN M. WILKS, Clarendon Laboratory, Oxford.....	701
Correspondence :	
The Low Energy Ion Bombardment of Gold. By D. G. BRANDON and PIERS BOWDEN, Department of Metallurgy, University of Cambridge	707
Reviews of Books.....	711

NUMBER 66—JUNE

Thermoremanent Magnetization I. Experiments on Single Domain Grains. By C. W. F. EVERITT, Imperial College, London.....	713
The Fermi Surfaces of the Noble Metals. By J. F. CORNWELL, Mathematics Department, Imperial College, London.....	727
The Flow Stress of Aluminium and Copper at High Temperatures. By P. B. HIRSCH and D. H. WARRINGTON, Crystallographic Laboratory, Cavendish Laboratory, Cambridge.....	735
The Face-centred Cubic Solid Solutions in Transition Metal Alloys of the First Long Period. By W. HUME-ROTHERY, Department of Metallurgy, University of Oxford.....	769

	PAGE
Heat Conduction by Liquid Helium II in Capillary Tubes I: Transition to Supercritical Conduction. By D. F. BREWER and D. O. EDWARDS, The Clarendon Laboratory, Oxford.....	775
Etch Figures on Alum and the Diamond Pattern. By M. OMAR and T. H. YOUSSEF, National Research Centre, Cairo, Egypt.....	791
The Ledge Theory of Recrystallization in Polycrystalline Metals. By P. W. DAVIES, A. P. GREENOUGH and B. WILSHIRE, Metallurgy Department, University College of Swansea.....	795
Soft X-ray Emission Spectrum of Niobium. By J. E. HOLLIDAY, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation, Research Center, Monroeville, Pennsylvania.....	801
Correspondence :	
Observations on the Oxygen Solubility and Magnetic Susceptibility of Body-centred Cubic Transition Metal Alloys. By R. T. BRYANT and E. W. EVANS, Research Department, Imperial Chemical Industries Ltd., Kynoch Works, Witton, Birmingham 6.....	805
Stored Energy and Electrical Resistivity in Deformed Metals. By L. M. CLAREBROUGH, M. E. HARGREAVES and M. H. LORETTO, Division of Tribophysics, C.S.I.R.O., University of Melbourne, Australia.....	807
The Direct Observation of Antiphase Boundaries in the Fe ₃ Al Superlattice. By M. J. MARCINKOWSKI and N. BROWN, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation, Research Center, Monroeville, Pennsylvania.....	811
Thermal Expansion at Low Temperatures. II: Electronic Component in Metals. By G. K. WHITE, Division of Physics, Commonwealth Scientific and Industrial Research Organization, Sydney, Australia	815
Stored Energy and Flow Stress in Deformed Metals. By L. M. CLAREBROUGH, M. E. HARGREAVES, A. K. HEAD and M. H. LORETTO, Division of Tribophysics, C.S.I.R.O., University of Melbourne, Parkville, N.2, Victoria, Australia.....	819
Segregation of Solute Atoms in Copper-Aluminium Alloys. By KOICHI NAKAZIMA and SHIGEYASU KODA, The Research Institute for Iron, Steel and Other Metals, Tohoku University, Sendai, Japan	823

NUMBER 67—JULY

Magnetomechanical Damping in Chromium. By M. E. DE MORTON, Australian Defence Scientific Service, Defence Standards Laboratories, Department of Supply, Maribyrnong, Victoria, Australia.....	825
The Interactions of π^- -mesons with Complex Nuclei in the Energy Range (100–800) mev. II. The Interaction Lengths and Elastic Scattering of 750 mev π^- -mesons in G5 Emulsion. By J. E. ALLEN, A. J. APOSTOLAKIS, Y. J. LEE, J. V. MAJOR and E. PEREZ FERREIRA, The Physics Department, The Durham Colleges in the University of Durham, Durham	833
The Influence of Impurity Atoms on the Annealing Kinetics of Electron Irradiated Copper. By D. G. MARTIN, Metallurgy Division, Atomic Energy Research Establishment, Harwell, Didcot, Berks.....	839
Stress Relaxation in Alpha-iron at Low Temperatures. By P. FELTHAM, Department of Metallurgy, The University, Leeds.....	847
The Half-life of Long-lived Lutetium-176. By A. McNAIR, Atomic Weapons Research Establishment, Aldermaston, Berkshire.....	851

	PAGE
Some Electrical Resistivity Measurements on a Series of Iron-Chromium Alloys. By R. W. POWELL, R. P. TYE and MARGARET J. WOODMAN, National Physical Laboratory, Teddington, Middlesex....	857
Reinterpretation of Discordant X-ray Results for the Debye Temperature of Silver. By F. H. HERBSTSTEIN, National Physical Research Laboratory, Council for Scientific and Industrial Research, Pretoria, South Africa.....	863
The Effect of Ordering on the Strength and Dislocation Arrangements in the Ni_3Mn Superlattice. By M. J. MARCINKOWSKI and D. S. MILLER, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation Research Center, Monroeville, Pennsylvania.....	871
The Precipitation of Lead during Decomposition of Lead Iodide by Electron Irradiation. By A. J. FORTY, H. H. WILLS Physics Laboratory, University of Bristol.....	895
The Critical Temperatures of Binary Alloys with One Magnetic Component. By G. M. BELL and W. M. FAIRBAIRN, Department of Mathematics, Manchester College of Science and Technology.....	907
Vacancy Trapping in Quenched Aluminium Alloys. By K. H. WESTMACOTT and R. S. BARNES, Atomic Energy Research Establishment, Harwell, D. HULL, Department of Metallurgy, The University, Liverpool and R. E. SMALLMAN, Department of Physical Metallurgy, The University, Birmingham.....	929
Correspondence:	
The Interfacial Energy of Coherent Twin Boundaries in Copper. By M. C. INMAN and A. R. KHAN, National Physical Laboratory, Teddington, Middlesex.....	937
Refractive Index of Solid Krypton and Solid Argon. By B. L. SMITH, Department of Physics, Queen Mary College (University of London), London, E.1.....	939
The Solubility of Krypton in Liquid Cadmium and Indium. By G. W. JOHNSON, Metallurgy Department, University of Leeds..	943
The Refractivity and Light Scattering of Crystals Containing Defects. By E. W. J. MITCHELL and J. E. WHITEHOUSE, J. J. Thomson Physical Laboratory, The University, Reading..	947
Reviews of Books.....	951

NUMBER 68—AUGUST

Dislocations in Visco-elastic Materials. By J. D. ESHELBY, Department of Physical Metallurgy, University of Birmingham	953
Hydrogen Nuclei of the Primary Cosmic Radiation. By C. J. WADDINGTON, H. H. WILLS Physical Laboratory, University of Bristol	965
On the Annealing of Prismatic Dislocation Loops in Aluminium. By F. KROUPA, J. SILCOX and M. J. WHELAN, Cavendish Laboratory, Cambridge, England.....	971
The Effect of Fatigue Stressing on the Diffusion Rate of Zinc in Aluminium. By S. PEARSON, A. J. BOARD and C. WHEELER, Metallurgy and Physics Department, Royal Aircraft Establishment, Farnborough, Hants	979
Measurement of Low-energy Beta-ray Spectra using a High-pressure Proportional Counter. By PAUL E. SHEARIN and ROBERT L. HOOVER, The University of North Carolina, Chapel Hill, N.C.	987

	PAGE
Observations on Charged Dislocations in Ionic Crystals. By J. VENNIK, G. REMAUT and W. DEKEYSER, Laboratorium voor Kristallografie en Studie van Vaste Stoffen, Rozier, 6, Ghent, Belgium	997
Ion Damage to Metal Films inside an Electron Microscope. By D. W. PASHLEY and A. E. B. PRESLAND, T.I. Research Laboratories, Hinxton Hall, Cambridge	1003
A Theory of the Electrical Properties of Liquid Metals. I. The Monovalent Metals. By J. M. ZIMAN, Cavendish Laboratory, University of Cambridge	1013
The Direct Observation of Lattice Defects by Field Ion Microscopy. By D. G. BRANDON and M. WALD, Department of Metallurgy, University of Cambridge	1035
Correspondence :	
The Observation of Four Types of Hall Constant Anisotropy in Copper and their Role in the Determination of the Fermi Surface. By J. E. KUNZLER and J. R. KLAUDER, Bell Telephone Laboratories, Incorporated, Murray Hill, New Jersey	1045
Surface Detachment from Polyethylene Crystals. By D. C. BASSETT, H. H. WILLS Physical Laboratory, University of Bristol, Bristol, 8, England	1053
Antinucleation Processes in Ferromagnetics. By A. JAŚKIEWICZ, Low Temperature Laboratory, Wrocław University	1057
Dimer Problem in Statistical Mechanics—An Exact Result. By H. N. V. TEMPERLEY, Atomic Weapons Research Establishment, Aldermaston, Berkshire, and MICHAEL E. FISHER, Wheatstone Physics Laboratory, King's College, London	1061
A Note on Abnormalities in the Travel Time of a Wave between two Extensive Apertures. By G. BRADFIELD and E. T. GOODWIN, National Physical Laboratory, Teddington	1065
Wide Stacking Faults in High Purity Copper Crystals. By J. T. FOURIE and R. J. MURPHY, National Physical Research Laboratory, Pretoria, South Africa	1069
Reviews of Books	1071

NUMBER 69—SEPTEMBER

The Growth of Ice Crystals on Freshly Cleaved Covellite Surfaces. By J. HALLETT, Department of Meteorology, Imperial College, London....	1073
Steep-sided Trignons on Diamonds. By EILEEN M. WILKS, Clarendon Laboratory, Oxford.....	1089
The High Temperature Electrical Resistance of Iron-Aluminium Alloys. By R. FEDER, P. H. THORNTON and R. W. CAHN, Department of Physical Metallurgy, University of Birmingham.....	1093
Observations of Precipitation in Thin Foils of Aluminium +4% Copper Alloy. By G. THOMAS, Metallurgy Department, Cambridge University and M. J. WHELAN, Crystallographic Laboratory, Cavendish Laboratory, Cambridge.....	1103
Changes of Elastic Modulus associated with Internal Friction in Sodium Chloride. By R. W. WHITWORTH, Department of Metallurgy, Imperial College, London.....	1115

	PAGE
Precipitate Hardening in an Aluminium-Copper Alloy. By J. G. BYRNE and M. E. FINE, Department of Materials Science, The Technological Institute, Northwestern University, Evanston, Illinois and A. KELLY, Department of Metallurgy, Cambridge University	1119
A Dislocation at a Free Surface. By ELIZABETH H. YOFFE, Cavendish Laboratory, Cambridge.....	1147
Mobility of Vacancy Pairs in Ionic Crystals. By K. THARMALINGAM and A. B. LIDIARD, Department of Physics, The University, Reading, Berkshire.....	1157
Two-phonon Infra-red Lattice Absorption in Diamond. By J. R. HARDY and S. D. SMITH, J. J. Thomson Physical Laboratory, University of Reading, England.....	1163
Heat Conduction by Liquid Helium II in Capillary Tubes. II. Measurements of the Pressure Gradient. By D. F. BREWER and D. O. EDWARDS, The Clarendon Laboratory, Oxford.....	1173
Correspondence:	
The Determination of Dislocation Densities in Thin Films. By R. K. HAM, C.S.I.R.O., Division of Tribophysics, University of Melbourne.....	1183
The Positive Ion Bombardment of Evaporated Single Crystal Gold Films. By E. GILLAM and M. PHILLIPS, The General Electric Company Limited, Central Research Laboratories, Hirst Research Centre, Wembley, England.....	1185
Note on the Scattering of Electrons by Stacking Faults in Lithium. By J. S. DUGDALE and D. GUGAN, Division of Pure Physics, National Research Council, Ottawa, Canada.....	1189
A Possible Explanation of the Results of the Preceding Note Regarding Scattering of Electrons by Stacking Faults in Lithium. By A. HOWIE, Cavendish Laboratory, Cambridge.....	1191
A Systematic Error in the Determination of Dislocation Densities in Thin Films. By R. K. HAM and N. G. SHARPE, Division of Tribophysics, Commonwealth Scientific and Industrial Research Organization, University of Melbourne, Victoria, Australia.....	1193
Reviews of Books.....	1195

NUMBER 70—OCTOBER

A Note on Thermoelectric Power and Inelastic Scattering. By A. M. GUÉNAULT and D. K. C. MACDONALD, Division of Pure Physics, National Research Council, Ottawa, Canada.....	1201
Rotational Bands in the 1p-Shell. By A. B. CLEGG, Clarendon Laboratory, Oxford.....	1207
Direct Measurements of Stacking-fault Energies from Observations of Dislocation Nodes. By A. HOWIE, Cavendish Laboratory, and P. R. SWANN, Department of Metallurgy, University of Cambridge.....	1215
The Occurrence of Dislocations in Crystals Grown from the Melt. By S. HOWE and C. ELBAUM, Physics Department, Metals Research Laboratory, Brown University, Providence, Rhode Island.....	1227
Theory of the Magnetic Properties of Igneous Rocks in Alternating Fields. By F. D. STACEY, Geophysics Department, Australian National University, Canberra, Australia.....	1241
The Force on a Moving Dislocation. By F. R. N. NABARRO, University of the Witwatersrand, Johannesburg.....	1261

	PAGE
Elastic Self- and Interaction Energies of Dislocation Jogs. By F. KROUPA and L. M. BROWN, Cavendish Laboratory, Cambridge, England	1267
Intensity of the Cosmic Radiation at Great Depths Underground. By J. C. BARTON, Northern Polytechnic, London	1271
Electron Theory of Interaction between Point Defects in Metals. By G. K. CORLESS and N. H. MARCH, Department of Physics, The University, Sheffield	1285
Correspondence:	
Quench Softening of Cu Whiskers. By F. W. SCHAPINK and H. B. M. WOLTERS, Koninklijke/Shell-Laboratorium, Amsterdam	1297
On the Creep of Metals at very Low Temperatures. By P. FELTHAM, Department of Metallurgy, The University, Leeds	1301
The Stacking-fault Energy of Graphite. By C. BAKER, Y. T. CHOU and A. KELLY, Department of Metallurgy, University of Cambridge	1305
Reviews of Books	1309

NUMBER 71—NOVEMBER

Theory of Linear Growth During Thermal Etching. By W. W. MULLINS, Department of Metallurgy, Carnegie Institute of Technology, Pittsburgh, Pa., U.S.A.	1313
An Electron Microscope Examination of Small Cobalt Particles Precipitated in a Gold Matrix. By P. GAUNT, Department of Physics, University of Sheffield, Sheffield, 10, and J. SILCOX, Cavendish Laboratory University of Cambridge	1343
The Observation of Dislocations to Accommodate the Misfit between Crystals with Different Lattice Parameters. By J. W. MATTHEWS, Department of Physics, University of the Witwatersrand, Johannesburg	1347
An Experimental Determination of the Electrical Resistivity of Stacking Faults and Lattice Vacancies in Gold. By R. M. J. COTTERILL, Crystallographic Laboratory, Cavendish Laboratory, Cambridge	1351
The Growth of Snow Crystals at Low Supersaturations. By T. KOBAYASHI, Department of Cloud Physics, Imperial College, London	1363
The Analysis of (d, p) Stripping Reactions by the Distorted Wave Born Approximation. By B. BUCK and P. E. HODGSON, Clarendon Laboratory, Oxford	1371
Direct Observation of Antiphase Boundaries in the AuCu ₃ Superlattice. By R. M. FISHER, Department of Metallurgy, University of Cambridge, and M. J. MARCINKOWSKI, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation, Research Center, Monroeville, Pennsylvania	1385
Some Remarks on the Boltzmann and Anti-Boltzmann Equations. By D. K. C. MACDONALD, Division of Pure Physics, National Research Council, Ottawa, Canada	1407
Correspondence:	
Direct Observation of Dislocations due to Epitaxy. By P. DELAVIGNETTE, J. TOURNIER and S. AMELINCKX, Solid State Physics Department, Centre d'Etude de l'Energie Nucléaire, MOL, Belgium	1419
Reviews of Books	1421

NUMBER 72—DECEMBER

	PAGE
Thermal Expansion at Low Temperatures. III. Potassium Chloride. By G. K. WHITE, Division of Physics, Commonwealth Scientific and Industrial Research Organization, Sydney, Australia	1425
Thermoelectricity of Lithium-Alloys at Very Low Temperatures. By D. K. C. MACDONALD, W. B. PEARSON and I. M. TEMPLETON, Division of Pure Physics, National Research Council, Ottawa, Canada	1431
The Kinetics of Precipitation from Solid Solutions by Nucleation and Diffusion Controlled Growth Processes. By J. BURKE, Department of Metallurgy, University of Liverpool	1439
Thermal Shock and Fracture in Crystals of Magnesium Oxide. By G. D. MILES and F. J. P. CLARKE, Metallurgy Division, Atomic Energy Research Establishment, Harwell, Berkshire	1449
The Pressure Dependence of the Thermoelectric Power of the Alkali Metals at Room Temperature. By J. S. DUGDALE and J. N. MUNDY, Division of Pure Physics, National Research Council, Ottawa, Canada	1463
Etchants for Revealing Dislocations in Lithium Fluoride and Other Crystals. By A. R. C. WESTWOOD, H. OPPERHAUSER, JR. and D. L. GOLDHEIM, Research Institute for Advanced Studies, Baltimore 12, Maryland, U.S.A.	1475
Cross-slip and Fatigue in Metals at Low Temperatures. By P. FELTHAM, Department of Metallurgy, The University, Leeds	1479
The Behaviour of Point Defect Clusters in Irradiated Metals. By R. S. BARNES, Metallurgy Division, Atomic Energy Research Establishment, Harwell	1487
The Dislocation Distribution in Face-centred Cubic Metals after Fatigue. By R. L. SEGALL, P. G. PARTRIDGE and P. B. HIRSCH, Crystallographic Laboratory, Cavendish Laboratory, Cambridge	1493
A Surface Effect Associated with Dislocation Ribbons. By R. GEVERS, S. AMELINCKX and P. DELAVIGNETTE, Solid State Physics Department, Centre d'Etude de l'Energie Nucléaire-MOL (Belgium)	1515
Correspondence :	
Interstitial Dislocation Loops in Magnesium Oxide. By G. W. GROVES and A. KELLY, Department of Metallurgy, University of Cambridge	1527
On the Temperature Dependence of Critical Resolved Shear Stress of an Al-4% Cu Alloy. By K. MATSUURA and S. KODA, The Research Institute for Iron, Steel and Other Metals, Tohoku University, Sendai, Japan	1531
Obituary	1535
Book Notices	1535
Subject Index	1537
Index of Authors (with Titles)	1543
List of Contents	iii
List of Plates	xiv

PLATES

- 1-2. Illustrative of G. REMAUT and J. VENNIK's Paper on Observations on an Electrical Effect obtained during Deformation of Sodium Chloride Crystals.
- 3-7. Illustrative of R. J. STOKES *et al.*'s Paper on Effect of Slip Distribution on the Fracture Behaviour of Magnesium Oxide Single Crystals.
8. Illustrative of R. ILLINGWORTH's Paper on Grain Boundary Luminescence in an Alkali Halide Phosphor.
9. Illustrative of S. HOWE and C. ELBAUM's Paper on The Relation between the Plastic Deformation of Aluminium Single Crystals and Polycrystals.
- 10-11. Illustrative of J. G. DUTHIE *et al.*'s Paper on The Study of High-energy γ -rays Produced by Cosmic Radiation at 40 000 feet.
- 12-15. Illustrative of A. N. GOLAND's Paper on Radiation-enhanced Helium Precipitation in Copper.
- 16-18. Illustrative of A. R. C. WESTWOOD's Paper on The Fracture Behaviour of Magnesium Oxide Bi-crystals.
- 19-23. Illustrative of R. W. DAVIDGE and R. W. WHITWORTH's Paper on Evidence for the Production of Debris by Moving Dislocations in Sodium Chloride.
24. Illustrative of F. KROUPA and P. B. PRICE's Paper on 'Conservative Climb' of a Dislocation Loop due to its Interaction with an Edge Dislocation.
25. Illustrative of J. T. BARTLETT and J. W. MITCHELL's Paper on Interactions between Dislocations with Burgers Vectors at 120° in Crystals of Silver Bromide.
- 26-28. Illustrative of G. K. WILLIAMSON and C. BAKER's Paper on A Comparison of Vacancy and Interstitial Loops in Graphite.
- 29-30. Illustrative of A. H. MELEKA *et al.*'s Paper on Evidence of Sub-surface Cross-slip in Fatigued Copper.
- 31-32. Illustrative of K. U. SNOWDEN's Paper on The Distribution of Deformation in Lead Fatigued *in vacuo*.
- 33-43. Illustrative of A. KELLER's Paper on Some New Habit Features in Crystals of Long Chain Compounds.
- 44-47. Illustrative of R. S. CRISP and S. E. WILLIAMS's Paper on The Soft X-ray Emission Spectra of Sodium, Beryllium, Boron, Silicon and Lithium.
- 48-49. Illustrative of N. J. WADSWORTH's Paper on The Influence of Atmospheric Corrosion on the Fatigue Limit of Iron-0.5% Carbon.
- 50-54. Illustrative of T. EVANS and D. H. SAUTER's Paper on Etching of Diamond Surfaces with Gases.
- 55-59. Illustrative of J. E. BRIGHT and M. J. RIDGE's Paper on Etch Pits and Dehydration Nuclei on Crystals of Gypsum.
- 60-61. Illustrative of P. B. PRICE's Paper on Dislocation Loops Formed in Zinc Crystals during Low Temperature Pyramidal Glide.
62. Illustrative of R. N. WILSON and P. J. E. FORSYTH's Paper on The Cooperative Movement of Dislocations in Very Pure Aluminium Foil.

- 63-64. Illustrative of M. J. MAKIN *et al.*'s Paper on Dislocation Loops and Hardening in Neutron Irradiated Copper.
65. Illustrative of G. F. BOLLING *et al.*'s Paper on An X-ray Study of Deformation Stacking Faults at Low Temperatures in Lead, some Lead Alloys, and Aluminium.
- 66-67. Illustrative of R. B. CAMPBELL and L. MULDAWER's Paper on Dislocation Decoration by Precipitation in Gold-Cobalt Alloys.
- 68-73. Illustrative of D. HULL and I. L. MOGFORD's Paper on Precipitation and Irradiation Hardening in Iron.
- 74-77. Illustrative of J. HOLDEN's Paper on The Formation of Sub-grain Structure by Alternating Plastic Strain.
- 78-82. Illustrative of A. J. FORTY's Paper on Helical Dislocations in Crystals of Lead Iodide.
- 83-84. Illustrative of P. DELAVIGNETTE and S. AMELINCKX's Paper on Large Dislocation Loops in Antimony Telluride.
- 85-86. Illustrative of A. SEEGER *et al.*'s Paper on Work-hardening of Hexagonal Close-packed Crystals and in the Easy Glide Region of Face-centred Cubic Crystals.
87. Illustrative of R. W. P. DREVER's Paper on A Search for Anisotropy of Inertial Mass using a Free Precession Technique.
88. Illustrative of D. G. BRANDON and PIERS BOWDEN's Paper on The Low Energy Bombardment of Gold.
- 89-91. Illustrative of M. OMAR and T. H. YOUSSEF's Paper on Etch Figures on Alum and the Diamond Pattern.
- 92-93. Illustrative of M. J. MARCINKOWSKI and N. BROWN's Paper on The Direct Observation of Antiphase Boundaries in the Fe_3Al Superlattice.
- 94-102. Illustrative of M. J. MARCINKOWSKI and D. S. MILLER's Paper on The Effect of Ordering on the Strength and Dislocation Arrangements in the Ni_3Mn Superlattice.
- 103-108. Illustrative of A. J. FORTY's Paper on The Precipitation of Lead during Decomposition of Lead Iodide by Electron Irradiation.
- 109-112. Illustrative of K. H. WESTMACOTT *et al.*'s Paper on Vacancy Trapping in Quenched Aluminium Alloys.
- 113-114. Illustrative of J. VENNIK *et al.*'s Paper on Observations on Charged Dislocations in Ionic Crystals.
- 115-121. Illustrative of D. W. PASHLEY and A. E. B. PRESLAND's Paper on Ion Damage to Metal Films inside an Electron Microscope.
- 122-124. Illustrative of D. G. BRANDON and M. WALD's Paper on The Direct Observation of Lattice Defects by Field Ion Microscopy.
- 125-128. Illustrative of D. C. BASSETT's Paper on Surface Detachment from Polyethylene Crystals.
129. Illustrative of J. T. FOURIE and R. J. MURPHY's Paper on Wide Stacking Faults in High Purity Copper Crystals.
- 130-132. Illustrative of J. HALLETT's Paper on The Growth of Ice Crystals on Freshly Cleaved Covellite Surfaces.
- 133-134. Illustrative of EILEEN M. WILK's Paper on Steep-sided Trigons on Diamonds.
- 135-142. Illustrative of G. THOMAS and M. J. WHELAN's Paper on Observations of Precipitation in Thin Foils of Aluminium + 4% Copper Alloy.
143. Illustrative of J. G. BYRNE *et al.*'s Paper on Precipitate Hardening in an Aluminium-Copper Alloy.
- 144-146. Illustrative of E. GILLAM and M. PHILLIPS's Paper on The Positive Ion Bombardment of Evaporated Single Crystal Gold Films.

147. Illustrative of A. HOWIE and P. R. SWANN's Paper on Direct Measurements of Stacking-fault Energies from Observations of Dislocation Nodes.
148. Illustrative of S. HOWE and C. ELBAUM's Paper on The Occurrence of Dislocations in Crystals Grown from the Melt.
149. Illustrative of C. BAKER *et al.*'s Paper on The Stacking-fault Energy of Graphite.
- 150-151. Illustrative of P. GAUNT and J. SILCOX's Paper on An Electron Microscope Examination of Small Cobalt Particles Precipitated in a Gold Matrix.
- 152-153. Illustrative of J. W. MATTHEWS's Paper on The Observation of Dislocations to Accommodate the Misfit between Crystals with Different Lattice Parameters.
- 154-156. Illustrative of R. M. J. COTTERILL's Paper on An Experimental Determination of the Electrical Resistivity of Stacking Faults and Lattice Vacancies in Gold.
157. Illustrative of T. KOBAYASHI's Paper on The Growth of Snow Crystals at Low Supersaturations.
- 158-162. Illustrative of R. M. FISHER and M. J. MARCINKOWSKI's Paper on Direct Observation of Antiphase Boundaries in the AuCu_3 Superlattice.
163. Illustrative of P. DELAVIGNETTE *et al.*'s Paper on Direct Observation of Dislocations due to Epitaxy.
- 164-170. Illustrative of G. D. MILES and F. J. P. CLARKE's Paper on Thermal Shock and Fracture in Crystals of Magnesium Oxide.
- 171-172. Illustrative of A. R. C. WESTWOOD *et al.*'s Paper on Etchants for Revealing Dislocations in Lithium Fluoride and other Crystals.
173. Illustrative of R. S. BARNES's Paper on The Behaviour of Point Defect Clusters in Irradiated Metals.
- 174-182. Illustrative of R. L. SEGALL *et al.*'s Paper on The Dislocation Distribution in Face-centred Cubic Metals after Fatigue.
- 183-184. Illustrative of R. GEVERS *et al.*'s Paper on A Surface Effect Associated with Dislocation Ribbons.
- 185-186. Illustrative of G. W. GROVES and A. KELLY's Paper on Interstitial Dislocation Loops in Magnesium Oxide.
